

ARCHITECTURAL WATERPROOFING CORPORATION is India's emerging top quality & innovative manufacturing company in the field of waterproofing chemicals. We manufacture a wide range of products that are used to apply on different kinds of concrete structure & surfaces with the main purpose of protecting it from any kind of climatic condition by which no cracks or leakages occur & it enhances the durability to the maximum years. With a world class manufacturing unit, with exceptional process development & scale up capabilities we are the perfect partner for any custom projects. The key to our success is the eagerness to find solutions to our customer needs & backed with a well qualified team to assist. AWC core strength is its consistency in its product quality. AWC has always been committed to invest in upgrading its product line and its manpower with the latest technologies & practices. This same practice has led the establishment to build up a rigorous quality management system that allows us to be the best in the highly demanding waterproofing industry.
